

# Data Science vs Machine Learning

# Agenda

---

# What Is Data Science?

# What Is Data Science?

*Data Science is the process of extracting useful insights from data by using a variety of tools, algorithms and Machine Learning fundamentals.*

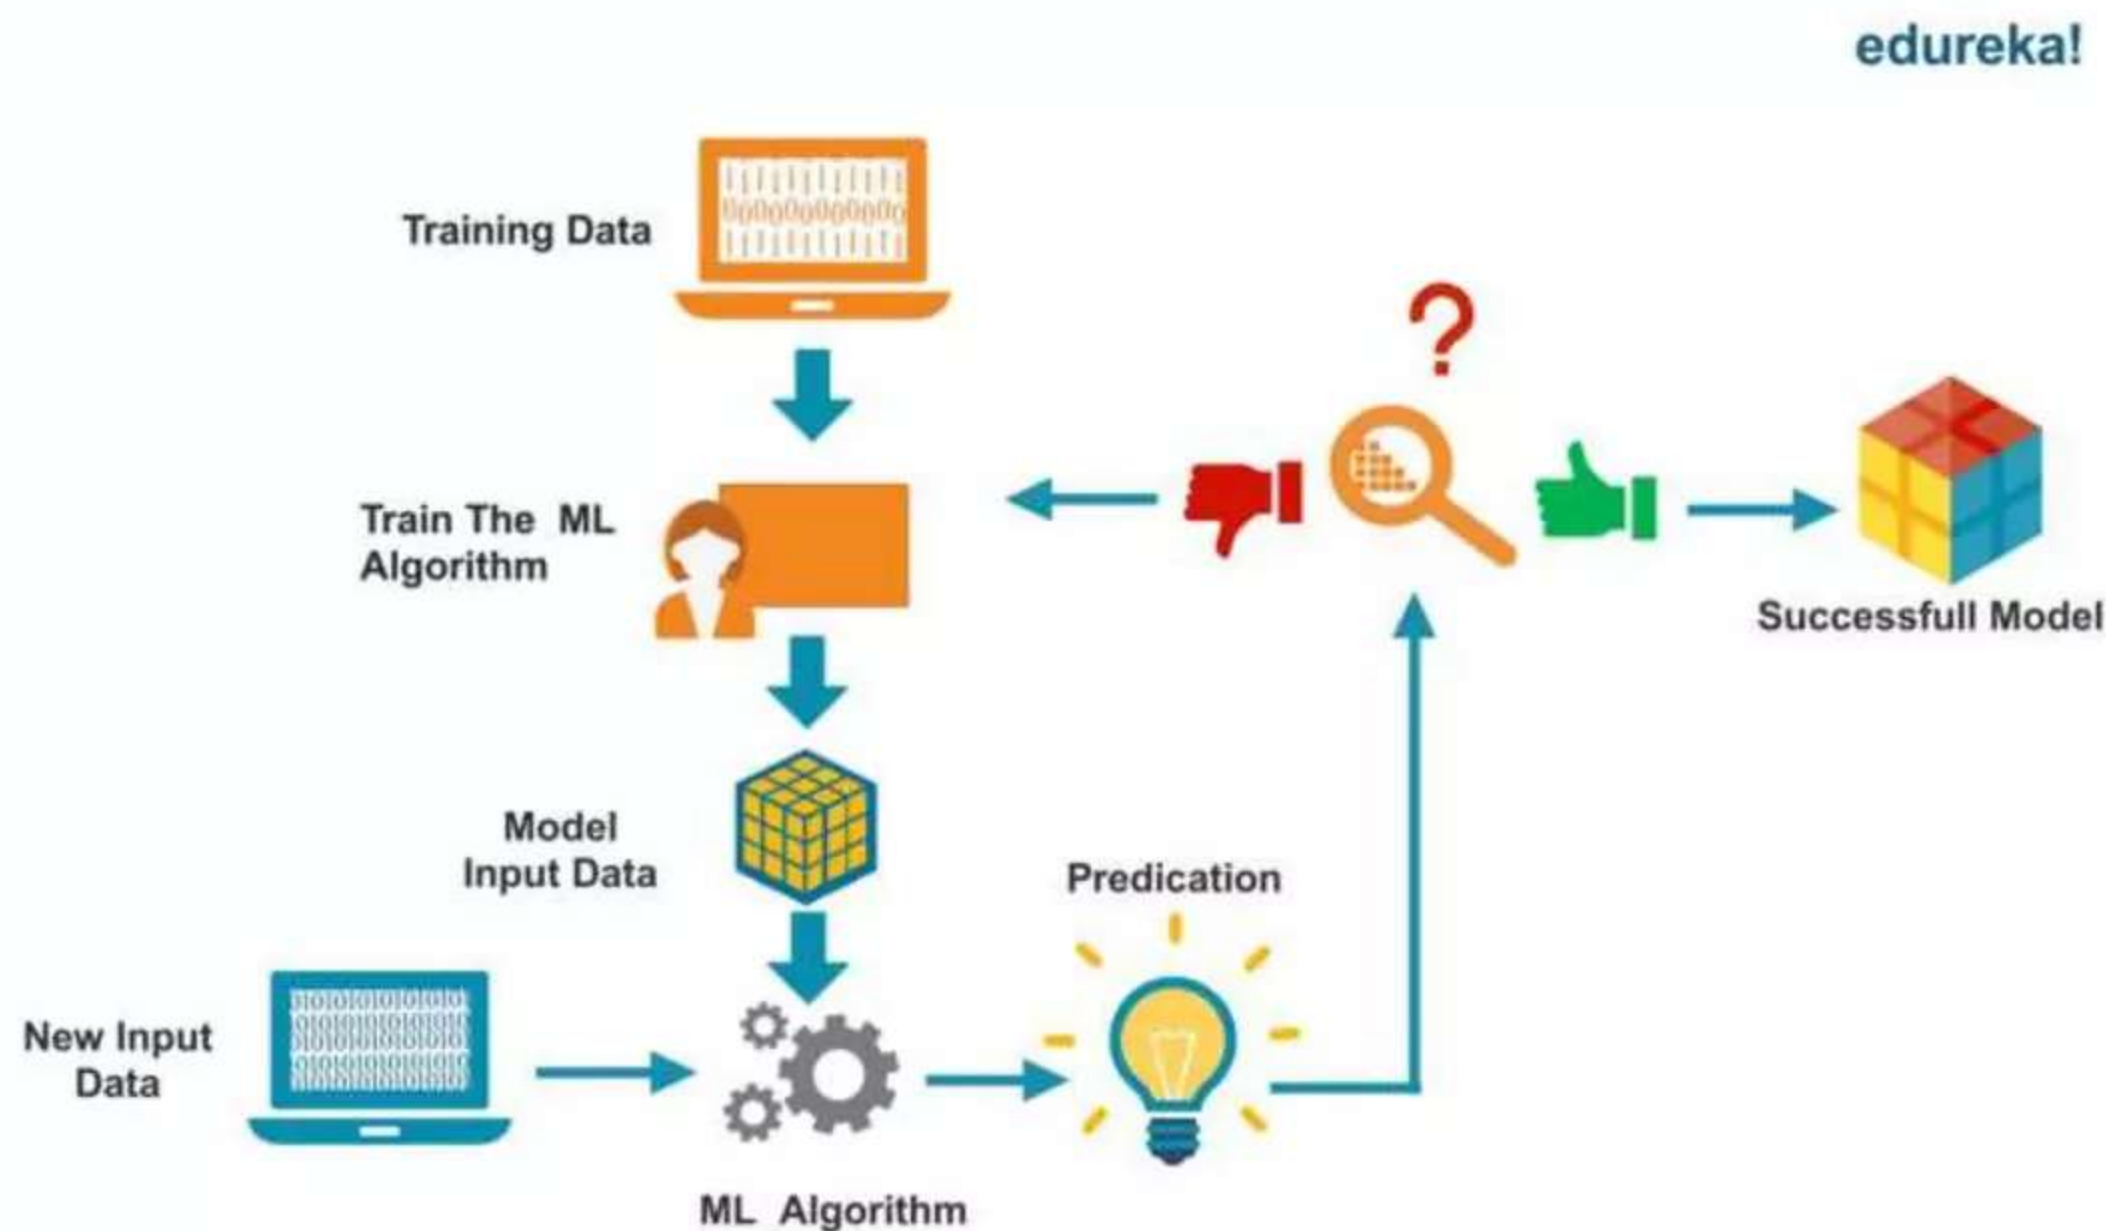

# What Is Machine Learning?

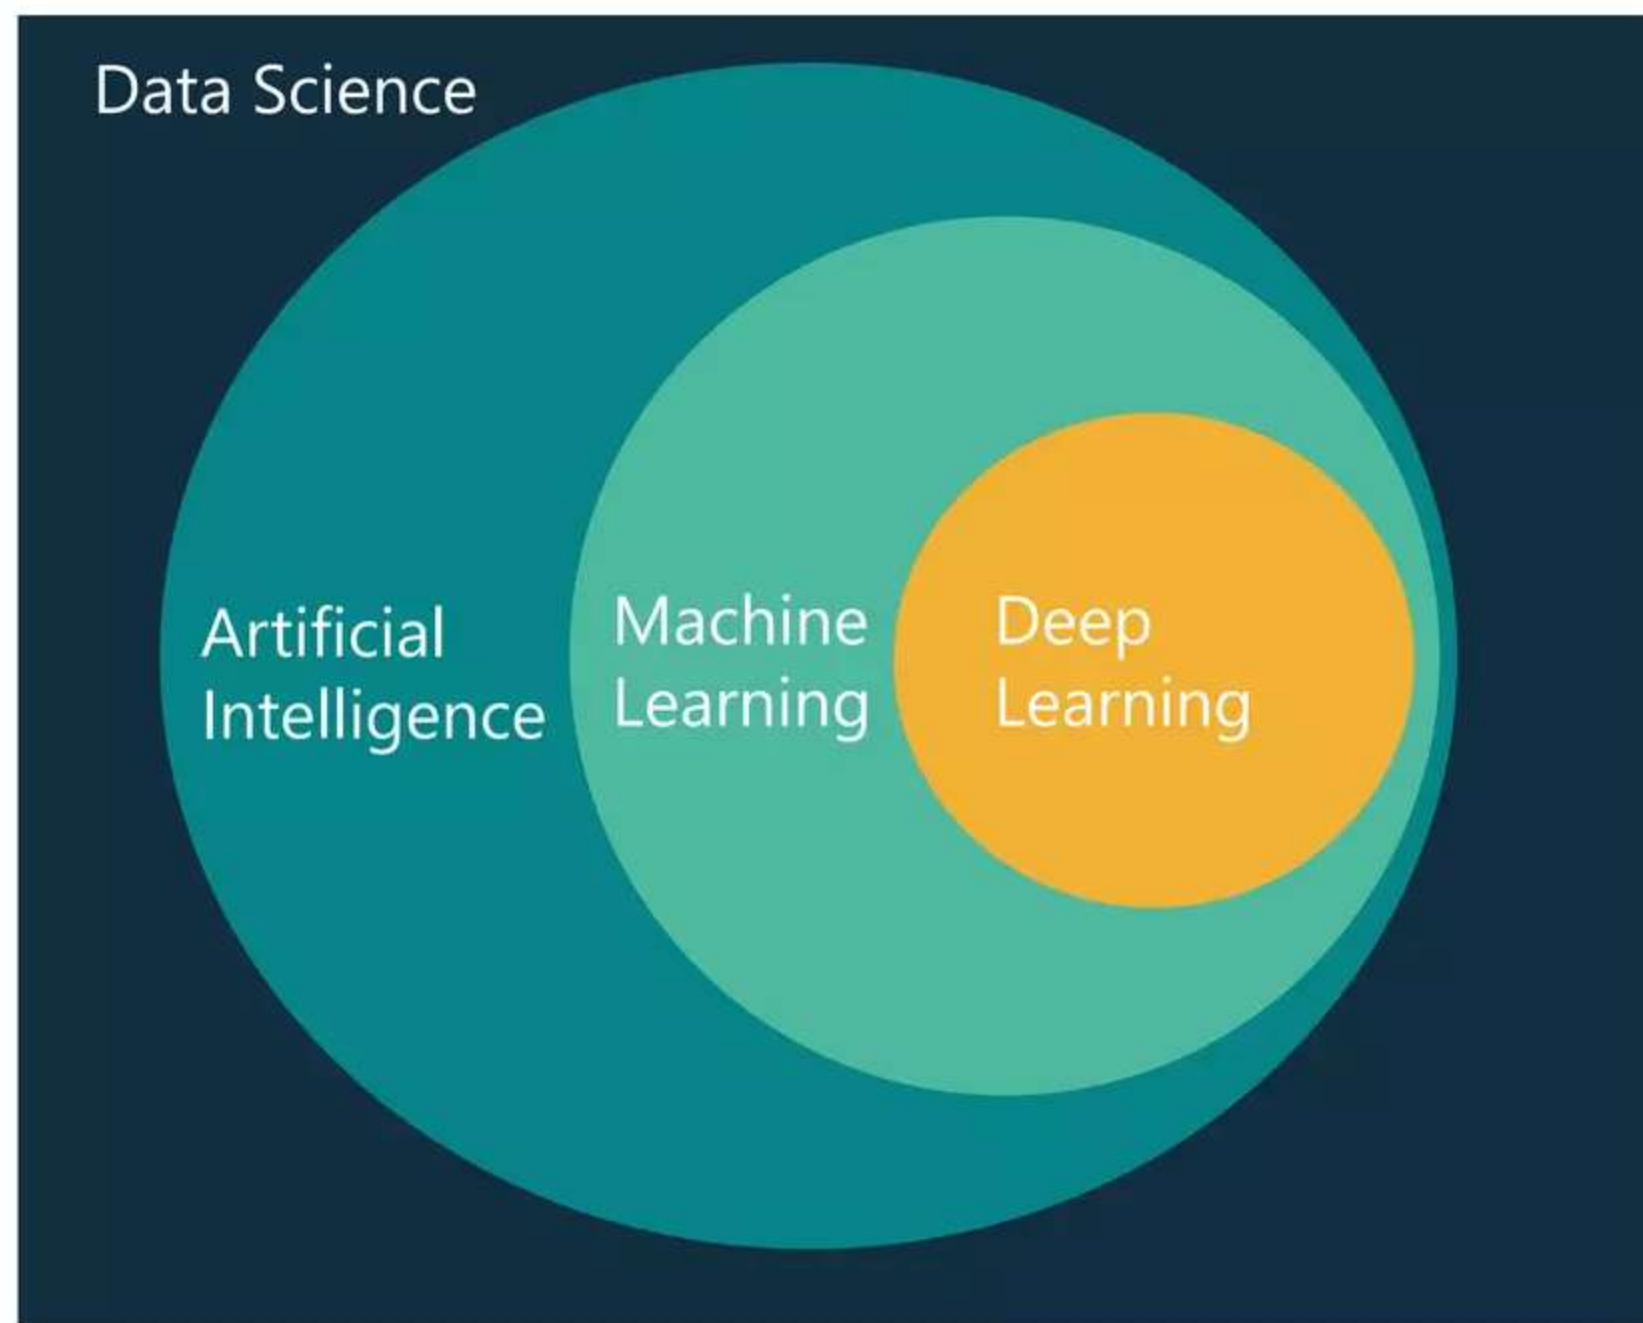

# What Is Machine Learning?

*Machine learning is a subset of Data Science which provides machines the ability to learn automatically & improve from experience without being explicitly programmed.*

# Fields Of Data Science

# Fields Of Data Science

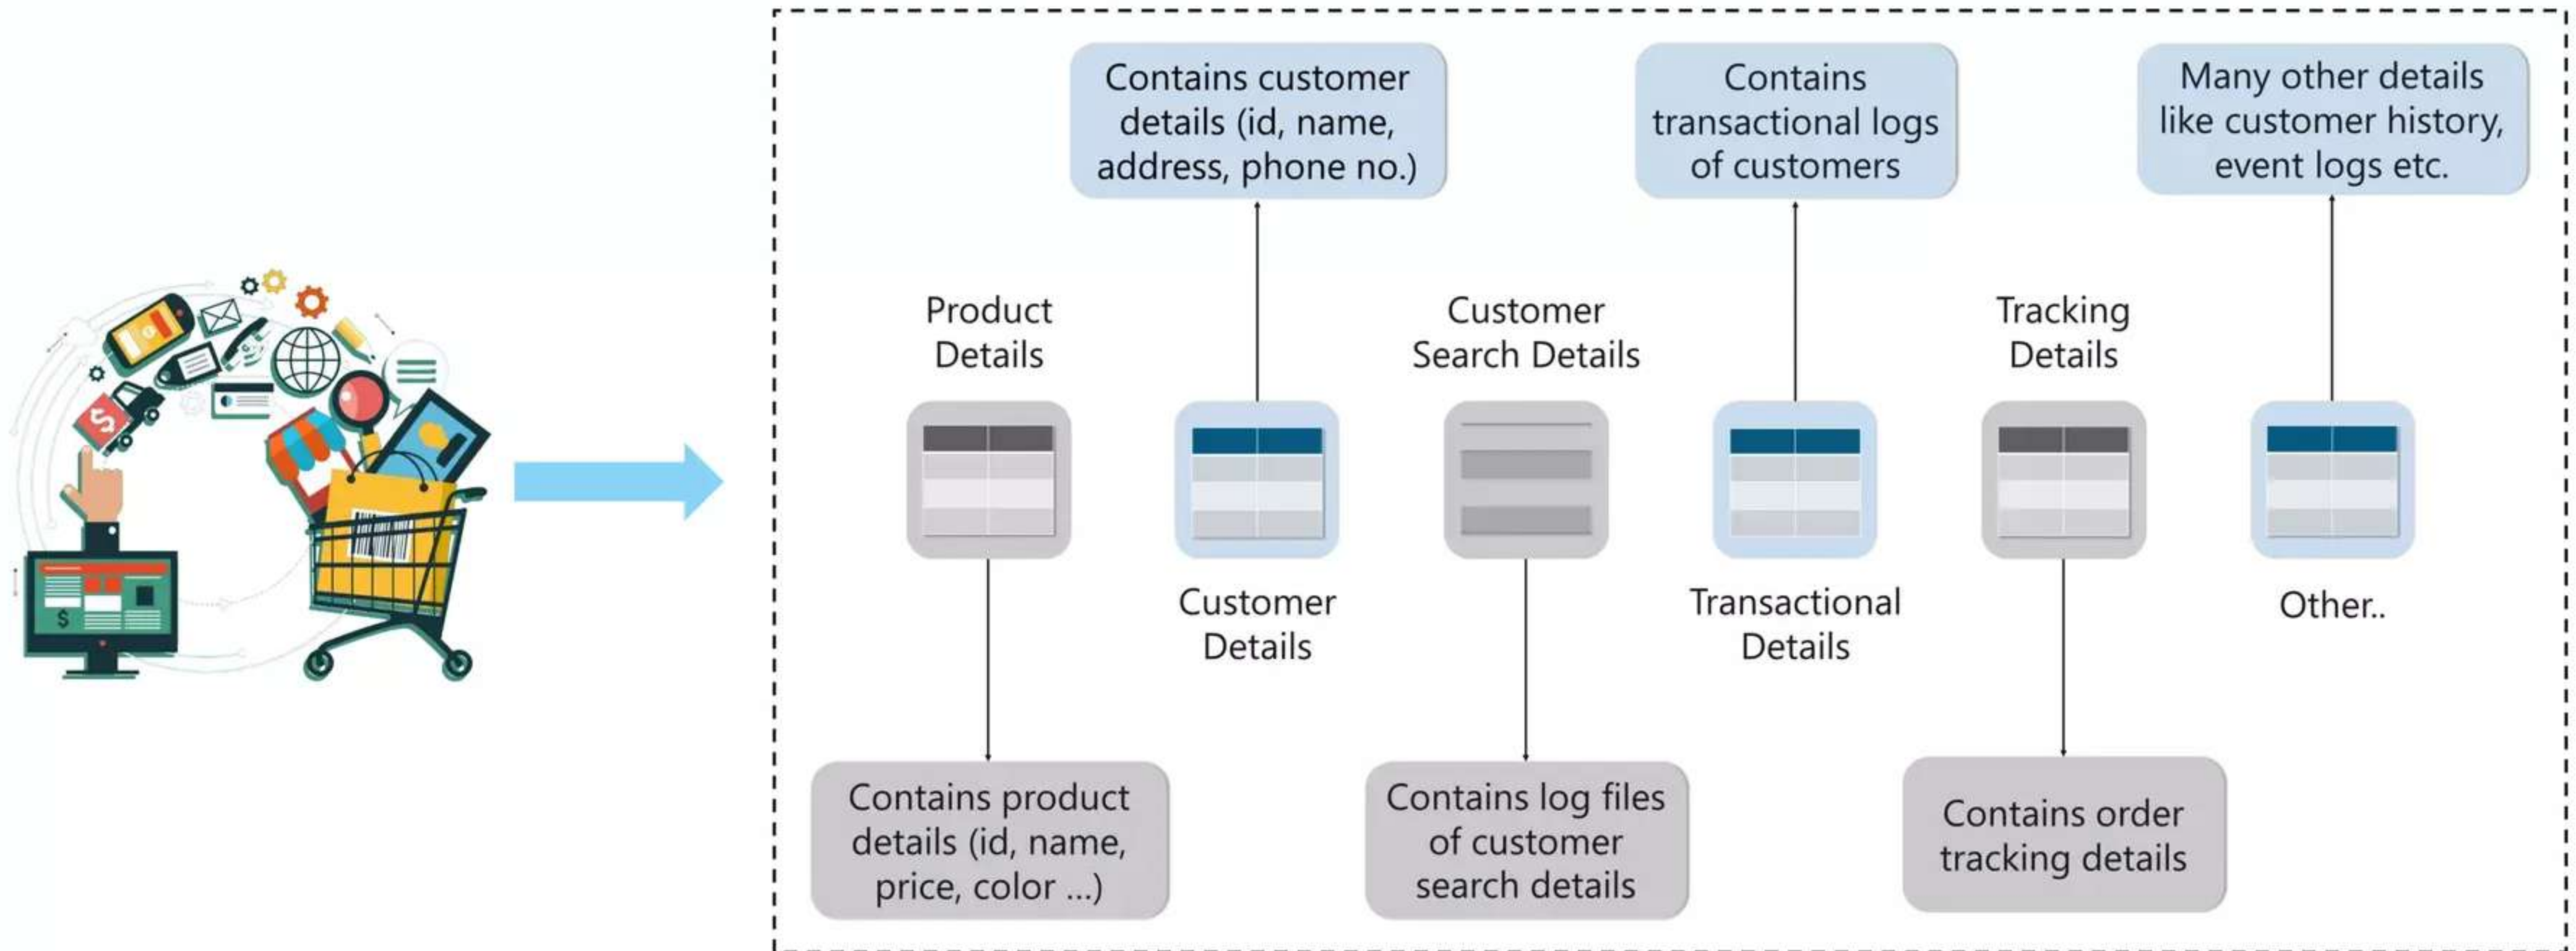

- *Data science* is the extraction of knowledge from data by using different techniques and algorithms
- *Artificial Intelligence* is a technique which enables machines to mimic human behaviour
- *Machine Learning* is a subset of AI technique which uses statistical methods to enable machines to improve with experience
- *Deep learning* is a subset of ML which make the computation of multi-layer neural network feasible

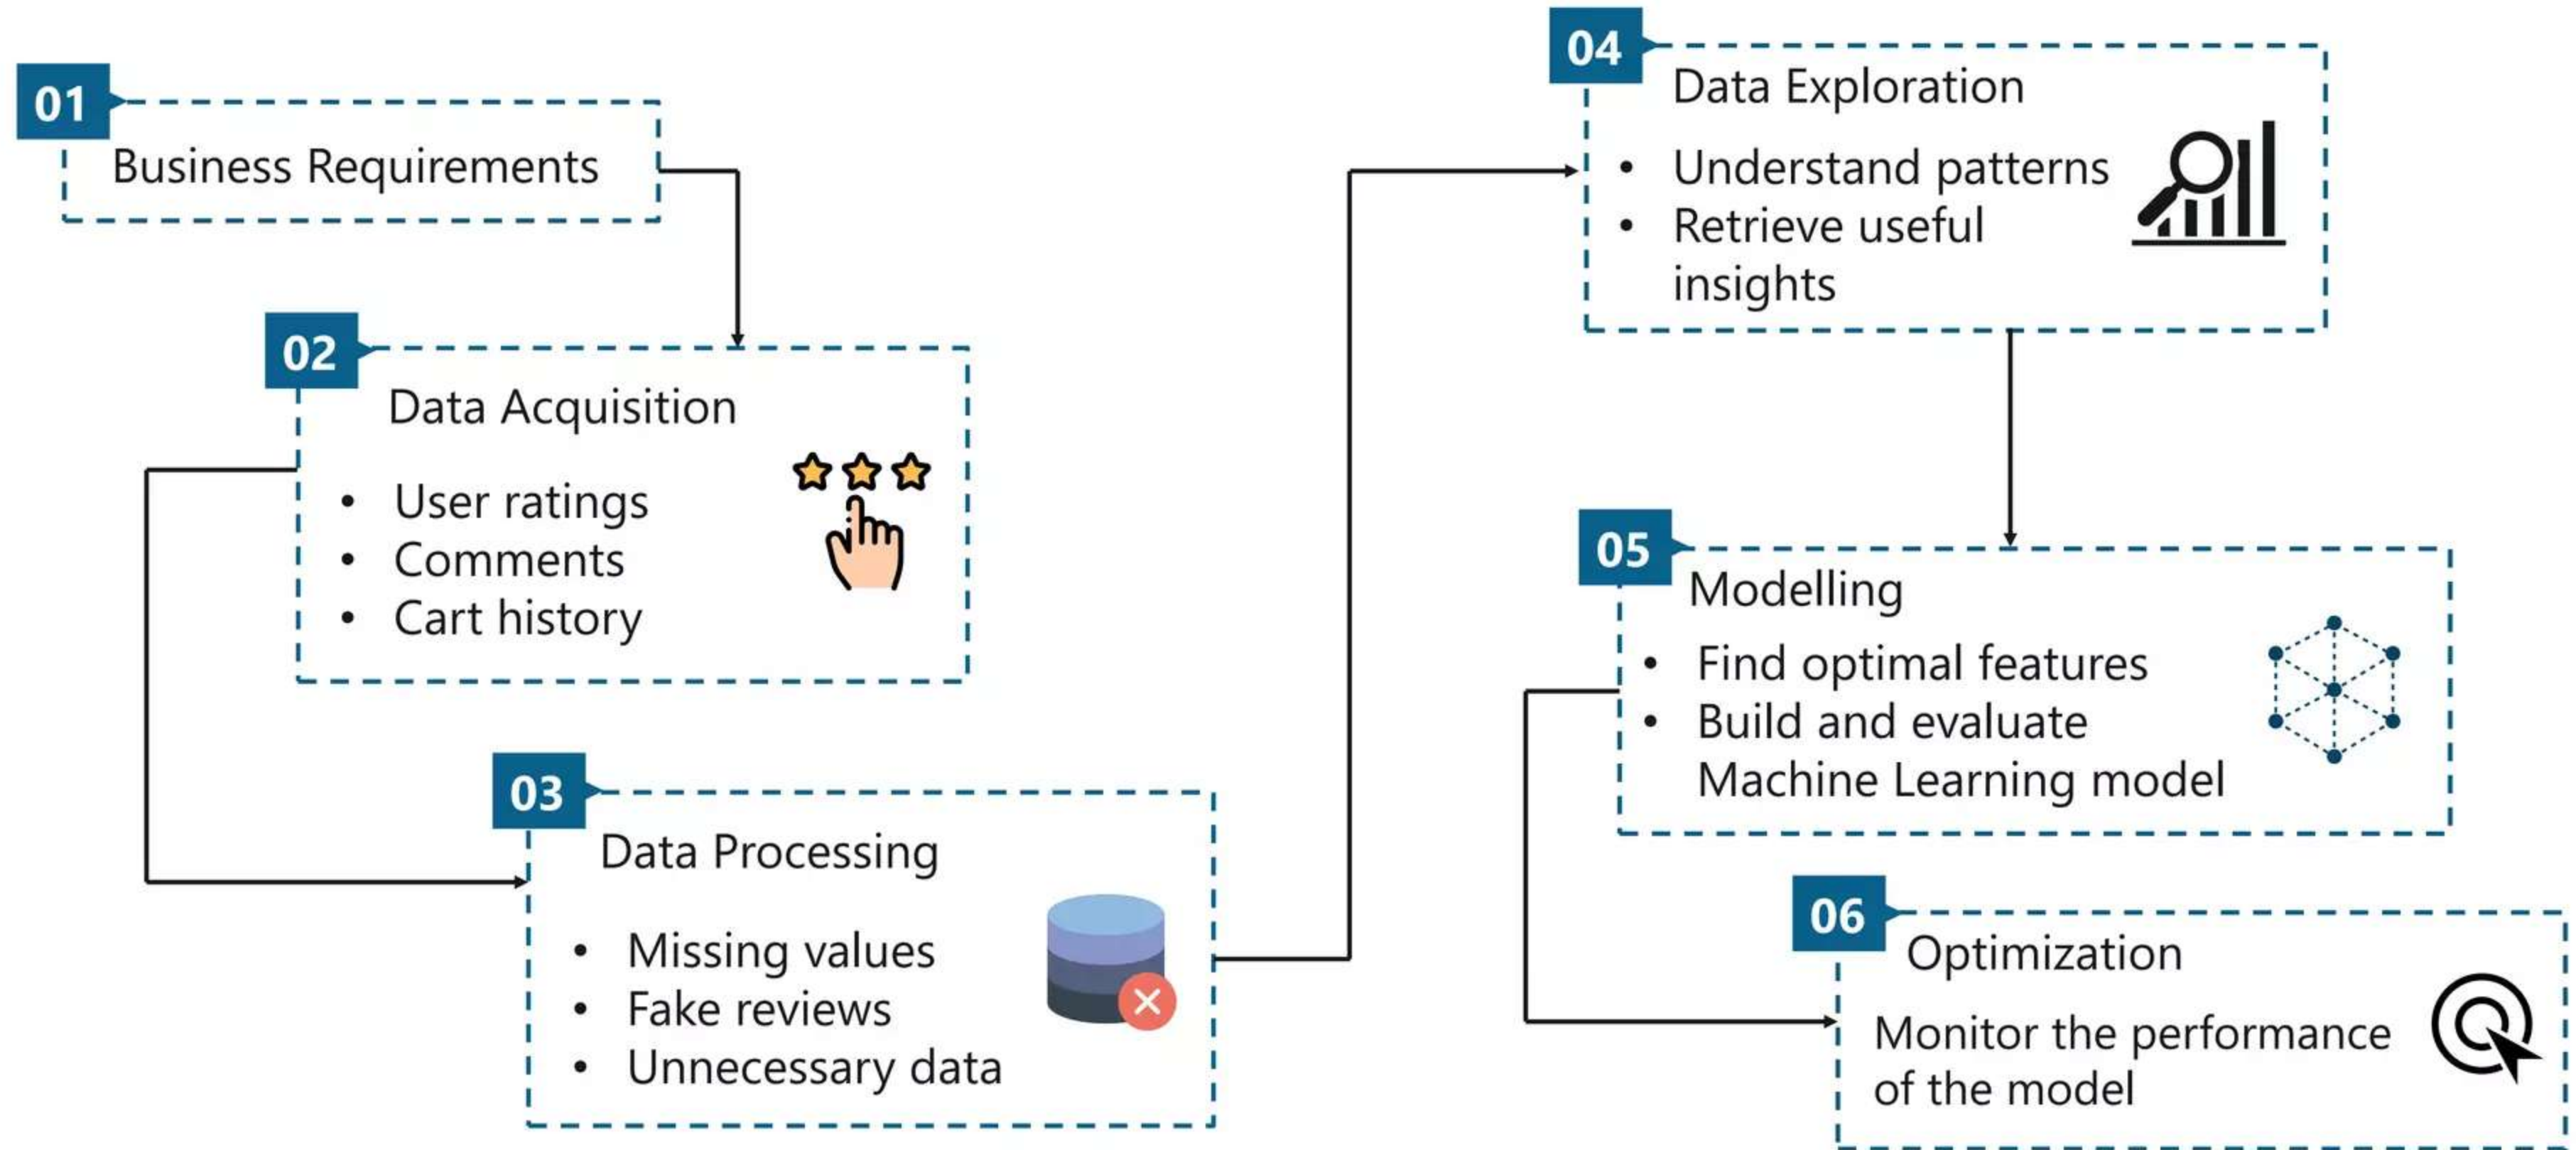

# Use Case

# Recommendation System

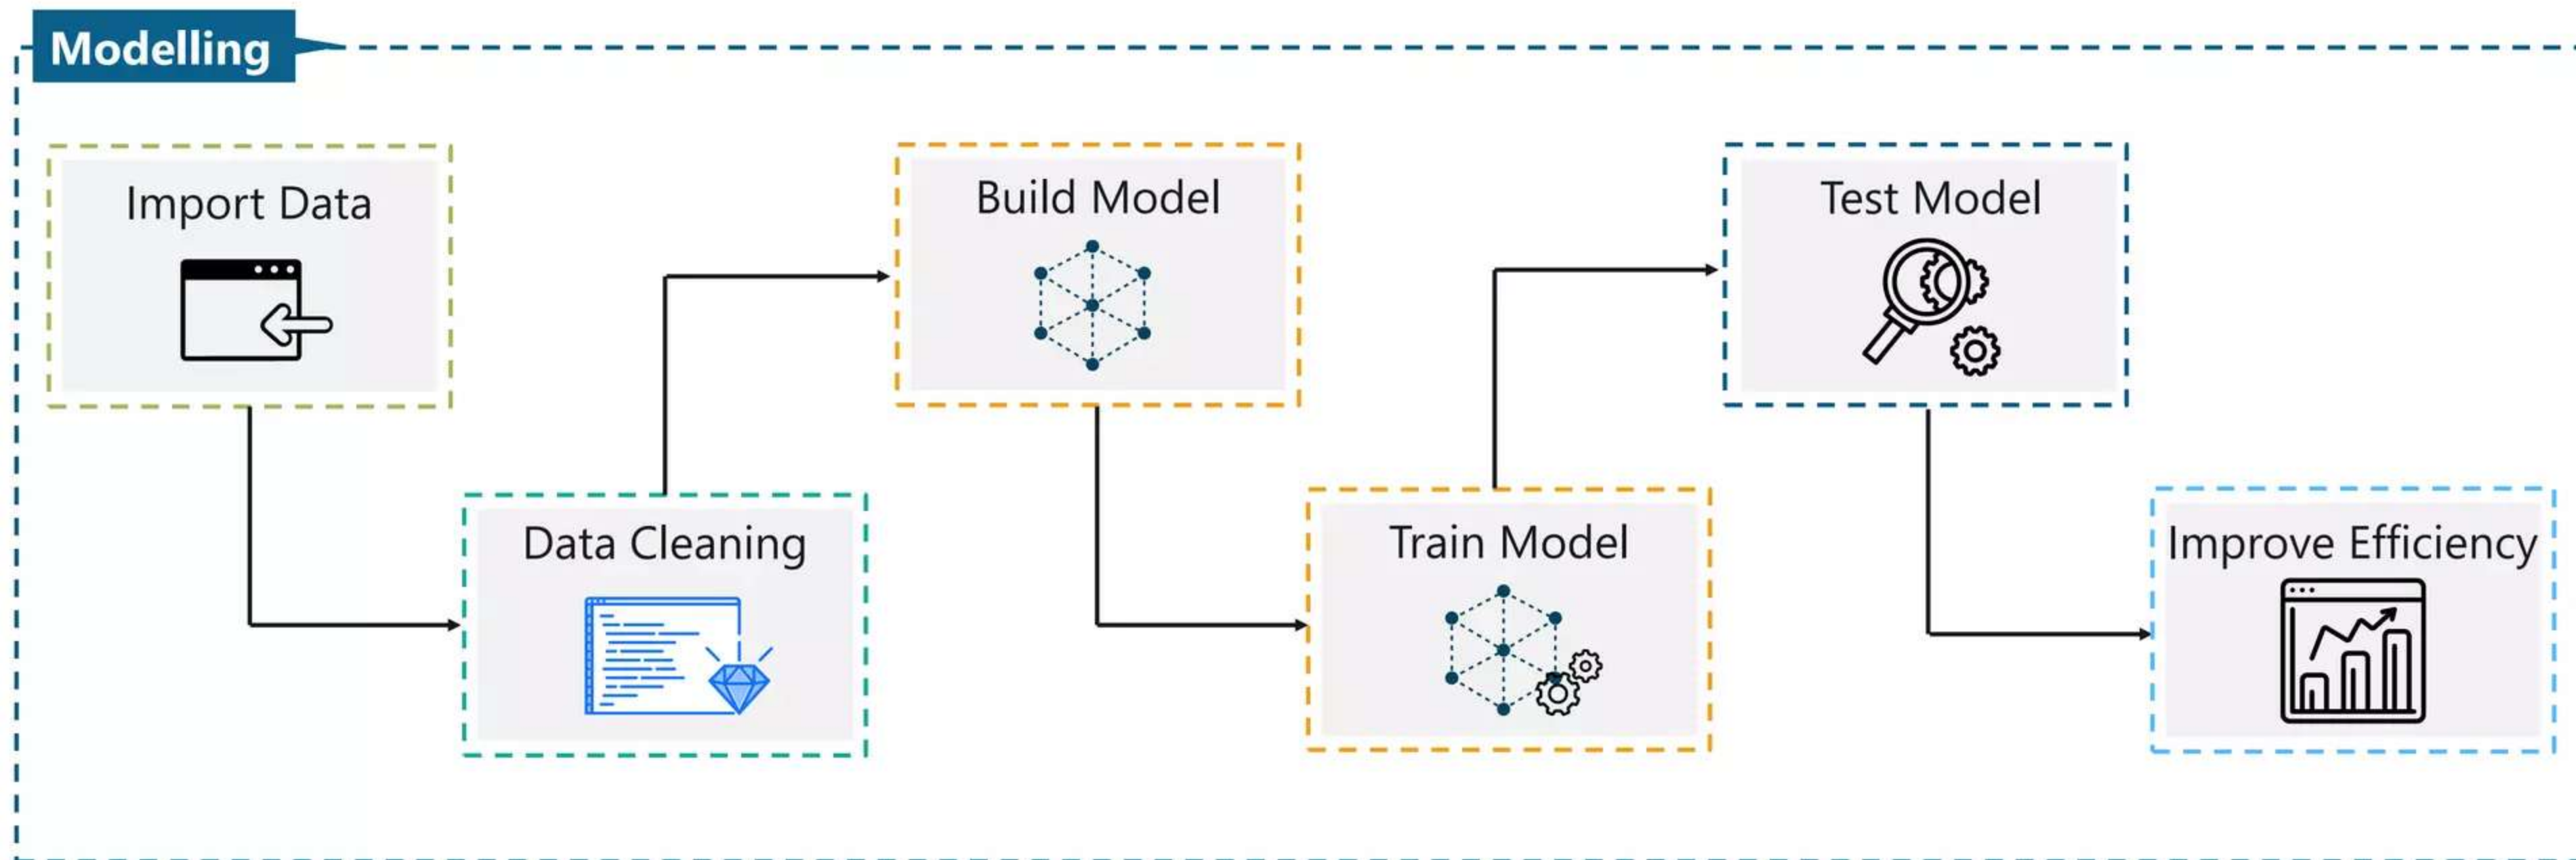

# Data Science

# Machine Learning

## Modelling

# Thank You
